## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 6-17, 20-26, 29-31, 33-39, 42-46, 48-64, 66-68, 70-86, and 88 are allowed.

The following is an examiner's statement of reasons for allowance: the closest prior art of record, Houk et al. (5,313,067) and Kellner et al. (Analytical Chemistry, Pp 827-828, 1998), teach measuring isotopes at extremely low concentrations and of very low abundance with an apparatus comprising a Inductively Coupled Plasma Source Mass Spectrometer equipped with a multi-dimensional detector system wherein ions transmitted by the mass spectrometer are detected with high selectivity. However, they are silent to the multi-dimensional detector system comprising a mulit-slit assembly, an optical detector, a voltage programmer and a charged beam steering optics or a charged beam steering optic coupled to the exit slit of the mass spectrometer, a voltage programmer, and a charged beam steering optic coupled to the exit port of the optical detector.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
